Hanen® has the tips!

Created in 1975 by Ayala Hanen Manolson, a Speech-Language Pathologist from Montreal, Canada, **Hanen®** is a family-focused approach developed for children 0-5 yrs of age with speech delays.

Hanen® believes that a child's parents and natural environment are fundamental in developing strong language skills. **The Hanen Centre®** was created to provide parents and professionals working with children the tools to promote language through everyday interactions; getting a head start on early intervention.

Listed below are links to valuable tips according to different stages in which children communicate.

Follow the link for children who:

*A*re not yet using words to communicate
